EDUCATION

FAST NUCES, – Islamabad

Aug'22 – Jun'26

Bachelors in Financial Technology

Beaconhouse Margalla Campus – Islamabad

Aug'18 – Aug'21

O/A-Levels

EXPERIENCE

TechDot Global – Business Development & Technology Executive

Nov'26

Drove client acquisition through Upwork and Fiverr, managed TechDot Global LinkedIn and Instagram by creating branded posts using Canva, supported full-stack client projects (including dashboards and custom platforms), performed QA testing, and contributed to website development and optimization.

Soneri bank – Islamabad, Pakistan

Aug'24

Streamlined customer financial services as a Banking Operations Associate by facilitating account openings, accurately processing cash transactions, and resolving account inquiries while ensuring regulatory compliance.

Rawalpindi Development Authority (Government of Pakistan) – Rawalpindi, Pakistan

July'24

Detail-oriented Full-Stack Developer with expertise in building scalable Python-based financial systems, secure RESTful APIs, and automated reporting solutions.

Vibe Coder, TechDot Global– Junior Developer, Pakistan

July'26

Built AI-assisted websites and business systems using React, Next.js, TypeScript, and Supabase. Developed and deployed scalable projects, including admin dashboards, management systems, and custom web applications.

Dakia.ai - SDR & Business Development Intern, Pakistan

Aug'26

Generated B2B leads through outbound calls, LinkedIn, and email while qualifying prospects, scheduling demos, and supporting business development efforts.

PROJECTS

ML PRO – Universal Machine Learning Platform

May'25

Developed a Python and Streamlit-based platform enabling no-code dataset uploads, machine learning model training, interactive visualizations, performance evaluation, and downloadable results through custom-designed UI.

Predictive Analytics Portfolio – Machine-Learning

April'25

Developed and optimized a Logistic Regression model in Python (scikit-learn) for breast cancer prediction, performing data cleaning, feature engineering, visualization, and feature selection to achieve high accuracy.

Easy Tax – Final Year Project

Aug'25 – May'26

Engineered a full-stack tax filing platform for Pakistan's salaried sector, integrating open-source OCR and machine learning to automate document extraction and FBR-compliant reporting; built using a React/Laravel architecture with Python-based data mapping and secured via OAuth and TLS encryption.

AgroScoreAI – Digital Payments Infrastructure Project

April'26

Developed a fintech platform integrating digital onboarding, mobile wallet transaction analysis, and payment workflow systems to support financial inclusion, partner integration, and compliance-based user verification.
